

PUBLIC TRANSPARENCY REPORT

2023

Fondita Fund Management Company Ltd

Generated 15-12-2023

About this report

PRI reporting is the largest global reporting project on responsible investment. It was developed with investors, for investors.

PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders.

This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2023 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2023 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

Fondita Fund Management Company acts responsibly in our business operations and fund management, which is stated in our Code of Conduct available on our homepage. We strive to always act responsibly and in accordance with sustainable development in our investment decisions and daily operations. Responsibility is grounded in our employees' values. In our principles for responsible investment, sustainability risk assessments and in all our operations, we consider the most common international agreements and standards directing society and business.

The goal of our investment management is to generate the best possible return for our customers. We aim to do this responsibly and in accordance with the selected investment strategy. Our principles for responsible investment are based on the belief that companies who act responsibly and work according to sustainable principles are better investment projects in the long term as the risks and opportunities related to the environment, society and governance (ESG factors) are more extensively explored. Therefore, it is essential to integrate ESG-related aspects when performing a company analysis.

Fondita signed the UN PRI in 2010 and we have since then actively developed our work in regards of responsible investments. As of late we have signed the Net Zero Asset Manager initiative to set carbon reduction goals for us as an asset manager and become a signatory of CDP Capital Markets, where we actively participate in the engagement campaigns set out by the organisation. We firmly believe teaming up with other asset managers sets us in a better position to engage with companies.

All Fondita funds, both small cap and theme funds, are actively managed funds based on bottom-up stock picking. The funds have a consistent investment philosophy and follow the same strategy for responsible investing. Our goal is to be a long-term owner of stocks in responsible, high-quality growth companies, and our driving forces are climate-smart solutions, health and well-being, and digitalization and technological development.

For Fondita, the responsible investment methods are: a) Negative screening as in exclusion/norm-based screening b) Positive screening as in enhanced thematic drivers c) Integration of ESG factors in the investment analysis d) Active ownership e) Advocate for sustainable development and responsible investment

Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
 - refinement of ESG analysis and incorporation
 - stewardship activities with investees and/or with policymakers
 - collaborative engagements
 - attainment of responsible investment certifications and/or awards

We have kept our relevant certifications, Nordic Swan Ecolabel for one of our funds and the Austrian Ecolabel for two of our funds. By obtaining these two certificates, we have been able to verify with an independent third party how we perform our ESG analysis and that our analysis meets the requirements required by these.

Our ESG assessment methodology was developed further and now also looks at materiality of each relevant sub criteria to E, S and G (example under E we have water stress, climate, clean tech opportunities etc.) and connects when relevant the risk or opportunity to financial indicators, in order to truly integrate the ESG assessment into the analysis process, instead of trying to weight it in as a separate risk or a score to the fundamental economic analysis.

Developed our monthly screening tool (of our holdings) take into account more parameters (additionally to checking it towards our exclusion policy, UN global compact violations, ILO violations etc) as well as further structured and defined our escalation process if anything is found in the screening.

Published our Code of Conduct

We became signatories of CDP Climate, Water and Forest

Recruitment of Head of ESG, which has increased the seniority level of our dedicated ESG personnel

Continued work in the ESG committee, nomination of external independent expert members with extensive academic and professional background regarding sustainability

We continue to regularly engage with Investor Relations of holdings or potential investment targets where we find gaps of data or information we want to be clarified which is part of our day to day. Larger collaborate engagements such as the CDP Non-Disclose Campaign in 2023 is something we strive to always participate in, in this example we engaged with 12 of our holdings. The next campaign we intend to participate in is the SBTi Campaign also done by CDP Capital Markets.

Lectures about responsible investing at Hanken School of Economics

Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

We want to improve our coverage for small and micro cap (which is not covered by available third party data) through creating an own database of information by conducting manual ESG assessments.

Continue to meet the audit requirements of our existing external certifications, as well as exploring the possibility for further certifications.

We want to further develop our engagement policy, as we see us already discussing a lot of ESG topics in the general company meetings. One important goal we have been working towards is that all of our holdings would have a carbon reduction target, which is important to us not only because of our focus on responsible investments but also because of being signatories to the Net Zero Asset Managers. This includes participation in collaborative engagement initiatives arranged by as an example CDP to encourage reporting, transparency and data availability in the responsible investment universe.

We plan to upgrade our Healthcare fund to article 9 (from article 8) and start researching the opportunity to upgrade further funds to article 9.

Continue to allocate resources towards engagement in sustainability related forums, such as seminars and panel discussions. Increase our role as a responsible investing advocate in sustainable investment forum organisations (Fondita is a member of Finsif and Swesif)

LE 5	PLUS	OO 21	N/A	PUBLIC	ESG incorporation in portfolio construction	1

Provide an example of how you incorporated ESG factors into your equity selection and research process during the reporting year.

We have an internal ESG assessment framework which is based on materiality. The assessment points are chosen with the inspiration of MSCI Materiality Map (<https://www.msci.com/our-solutions/esg-investing/esg-industry-materiality-map>) depending on what sector the company operates in, we however deviate accordingly to what we determine as material in the relevant sector. The result of the ESG assessment is connected to financial indicators, to truly be integrated in the investment analysis decision, instead of trying to weight in a separate ESG risk rating with the financial assessment. We conduct this process to all potential investment targets (before investing) and we are in the process of mapping all of our existing holdings with the same methodology, to create a internal ESG opportunities and risk database.
